

PUT A LID ON YOUR COSTS

DO IT ONCE. DO IT RIGHT.

SECURING A LIFETIME OF SERVICE FOR YOUR INFRASTRUCTURE ASSETS

Sika's aluminium chambers and access covers deliver superior value for underground service networks, through their innovative die cast aluminium design, ease of installation, structural integrity, and ultimate durability. Get *the Hole Cost Advantage* and secure your infrastructure investment with Sika products.

Sika provides innovative cover set options that provide both "form" and "function". With complete functionality and performance, our cover sets also look fantastic – year after year.

COVERS THAT ARE STRONG, DURABLE AND BEAUTIFUL

- Pathway (Class B) and Roadway (Class D) solutions
- Access Cover and frame provided as a complete solution, along with kitset reinforcing steel for Class D solutions
- Stainless steel locking systems provide secure access and peace of mind
- A variety of surface options are available including 'solid top' aluminium, painted, and infill paver
- Partial Access solutions available for larger size enclosures
- Comply with European and Australasian Standards EN 124, AS 3996 and AS / NZS 4586, exceeding their requirements for Slip / Skid Resistance
- Best used with Sika Chambers for a complete solution

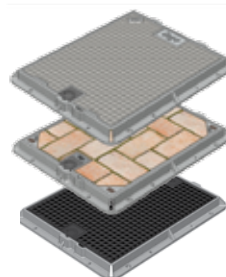

Sika has been granted a StandardsMark Licence by SAI Global for the manufacture of Aluminium Security Access Cover Sets allowing the "5 ticks" product certification mark to be displayed on our product.
