

# CHAMBER INNOVATION

**DO IT ONCE. DO IT RIGHT.**

## THE FASTEST, EASIEST & LOWEST-COST CHAMBER TO INSTALL. EVER.

The innovative aluminium Variable Height Jointing Chamber with Pathway Security Access Cover provides a lightweight but rigid product that dramatically reduces the cost of installation by eliminating the requirement for a concrete support collar. There is no need for installers to return to site for de-shuttering and finishing details.

## REDUCING COSTS IN EVERY WAY.

### NO CONCRETE REQUIRED

- A height and slope adjustable aluminium collar enables installers to match the required ground level
- Easy to install with a small crew
- Easy to install around existing ducts or cables
- PVC duct entry panels that only require hand tools for penetration
- Side slots with caps enable quick install of looped side fibre
- Chambers can be stacked, providing low freight costs and transport efficiencies

### UNBEATABLE LIFETIME PERFORMANCE

- Unmatched durability with 45 years guaranteed corrosion resistance
- Smooth, rigid, external aluminium sidewalls will withstand mechanical compaction of backfill without any internal support, reducing the likelihood of surrounding earth subsidence
- Cover Set has lock block security with customer specific keys

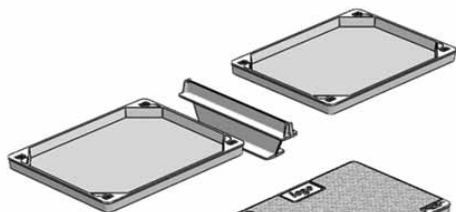

### LEGACY BENEFIT

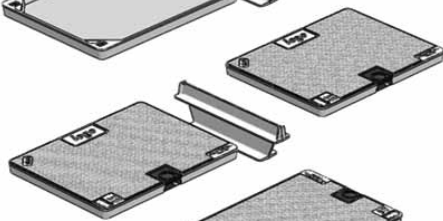

- Low cost of disposal
- 100% recyclable
- The residual value of aluminium at the end of its service life makes Sika products a long-term asset

# FEATURES

- Small chamber footprint suits congested locations
- Available in a range of cover options: Solid Top and Infill Paver
- Complies with relevant standards (AS 3996, AS NZS 4586, ANSI/SCTE77)
- Enclosures and cable management accessories are easily bolted to chamber walls

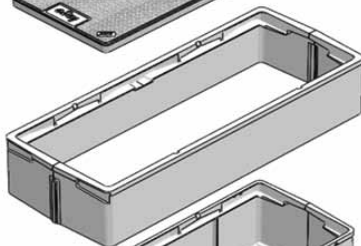

**Access Covers - Two Piece Option**  
Infill Paver and Solid Top Surfaces

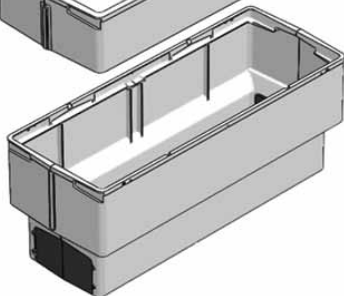

Customised Security Lock Block

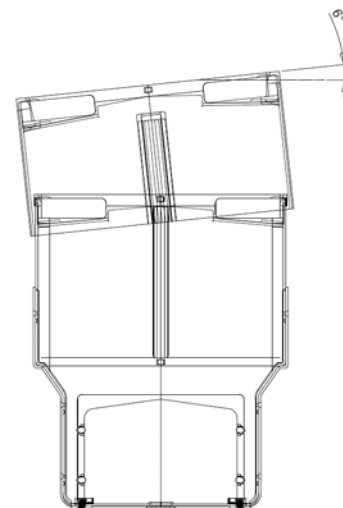

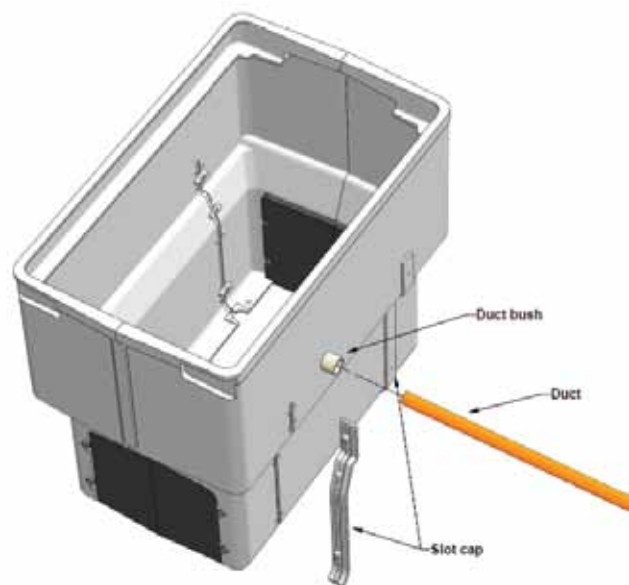

**Access Cover - One-Piece Option**

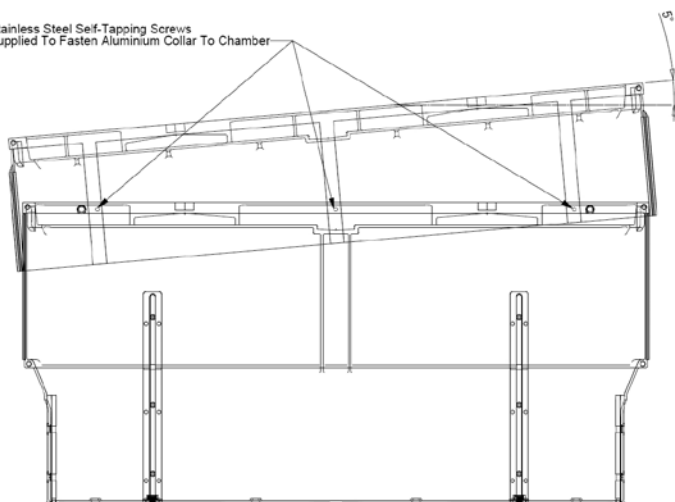

**Variable Height Aluminium Collar**

**Aluminium Jointing Chamber**

Stainless Steel Self-Tapping Screws  
Supplied To Fasten Aluminium Collar To Chamber

250 mm Extension
